EDUCATION

Parul University
Bachelor of Technology

Gujarat Vadodra
2022 - 2025

PROJECTS

Imaginify -Sass | *Next.js , Clerk , MongoDB , Stripe , Cloudinary , shadcn Ui- visit* Feb 2024

- Proficient with Imaginify, an online image editor leveraging Cloudinary AI, and Clerk for webhooks and user management.
- Many features to edit image like bgremover , coloring , object remove ,aspectratio ,etc with limited credits
- Implement stripe to buy more credits
- Tailwind css for styling and it is fully responsive

Sketch Book | *Nextjs , canva ,Socket.Io,Redux ,Nodejs -visit* Feb 2024

- Implemented using a tech stack comprising Nextjs, Nodejs, SocketIO, and Redux for seamless real-time collaboration and totally responsive
- Leveraged SocketIO to enable real-time synchronization, allowing simultaneous drawing across multiple screens
- Empowered users to sketch, erase, and select colors and stroke sizes effortlessly with also undo ,redo and download functionality
- Soon going to add more complex features build in progress

Car-Market-Place | *React ,PostgreSQL ,DrizzleOrm , Tailwind , ShadcnUi ,Firebase Storage , -visit* Dec -2023

- In this project, I built a car marketplace using React with Shadcn UI, allowing users to browse and add cars for sale. Users can list their own vehicles by providing details like make, model, year, and price
- Responsive design with login ,logout functionality add to cart features and many more
- The app also includes a monthly payment calculator where buyers can calculate loan payments based on loan terms, interest rates, and car price. For communication.
- I integrated Sendbird to enable real-time chat between buyers and car owners.

Rentals | *React.js , nodejs , Mongoddb , Scss ,Redux ,ExpressJs ,Cloudinary- visit* jan -2024

- Rentals is a web-based platform facilitating rental property management, allowing property owners to list their properties for rent while enabling users to browse and book rentals seamlessly with search function
- Hosts can upload multiple images of property ,select multiple facilities and can upload many more things about property Where user can put properties into favourites and book with specific time and date with real time calendar which automatically counts money

Video Calling App | *Nextjs , Socket.Io ,WebRtc* feb 2024

- A real-time video conferencing application built using Nextjs, Peerjs, and WebSockets, enabling multiple users to engage in seamless video calls akin to Google Meet
- With Peerjs integration, users can establish peer-to-peer connections for low-latency video streaming, while WebSockets facilitate real-time communication for features like chat and screen sharing

TECHNICAL SKILLS

Languages: Html, Css, JavaScript ,C++

Frameworks: React, Node.js, Nextjs

Database: MongoDB, postgresql and supabase ,drizzle

Libraries:Clerk, Tailwindcss, Socket.IO , shadcn ui,Material-UI,Bootstrap,

Tools: Git, Vercel ,Render ,vscode

Extra Skills: Video Editor ,Freelancer ,Problem Solving Skills, Always Learning New things
